Education

Institute of Aeronautical Engineering

Bachelor of Technology in Computer Science and Engineering

Nov, 2021 – May, 2025

Dungigul, Hyderabad, Telangana

Internships

Pullulate Pvt Ltd

Web developer

May, 2023 – December, 2023

Hyderabad

- Developed and launched the startup's official website, collaborating closely with a cross-functional team to ensure alignment with business goals.
- Led the design and implementation of responsive web layouts, enhancing user engagement and accessibility.
- Provided continuous website maintenance, including regular updates, bug fixes, and feature enhancements.

CodeClause- Internship

Python developer

July, 2023 – August, 2023

Remote

- Successfully developed two Python-based projects utilizing libraries such as pyshorteners and pyperclip, tailored to meet specific user requirements.
- Enhanced coding proficiency by implementing best practices in Python development, resulting in efficient and maintainable code.
- Collaborated with remote teams to deliver project milestones on time, demonstrating strong communication and time management skills.

Projects

🔗 Tech-Farmers (Agri-Tech Education Platform)

Website

- Enabled seamless connectivity between farmers and agri-tech startups through chat systems, and a support network, promoting agricultural practices.
- Leveraged technologies such as html, css, javascript for a responsive, user-friendly frontend.
- Created an all-in-one online platform offering learning courses, farming related products, and expert consultations to enhance farmer's knowledge and practices.

🔗 Petty Cash Book Management System (Award)

Website

- Developed a web application for efficiently recording and tracking small expenses, featuring a clean and minimal user interface for intuitive management of petty cash transactions.
- Utilized a robust tech stack including Node.js, Express.js, MongoDB, and EJS for seamless backend and frontend integration, ensuring reliable performance and user experience.
- Implemented Model-View-Controller (MVC) architecture for efficient development and maintenance.

Technical Skills

Languages: Python, Java & JavaScript

Web Development: HTML, CSS, NodeJS, ExpressJS, EJS, MongoDB, SQL, ReactJS, Git, GitHub

Concepts: Data Structures and Algorithms, object oriented Programming, Operating System, Database Management System, computer Network

Coding Profiles
